IF YOU DELAY ORDERING—ASK FOR QUOTATIONS

Special Quantity Field Seed Price List

The Western Seed Co.

MARCH 1, 1937

Prices herein are today's values and subject to change without notice.

OUR TERMS ARE STRICTLY CASH WITH ORDER—F. O. B. DENVER, COLORADO.

Quantity prices will be allowed on assorted orders. If your order totals 500 lbs. use the 500 lb. price on each variety; if it totals 1000 lbs. apply the 1000 lb. price, and so on.

THE WESTERN SEED COMPANY GIVES NO WARRANTY, EXPRESS OR IMPLIED, AS TO DESCRIPTION, QUALITY, PRODUCTIVENESS, OR ANY OTHER MATTER OF ANY SEEDS THEY SEND OUT, AND WILL NOT BE IN ANY WAY RESPONSIBLE FOR THE CROP.

Our GOLD SEAL Brand is an emblem of Quality and the Badge of Confidence. A long period of consistent Quality has built this Trust.

SEMESAN JR. By all means treat your field corn. Semesan Jr. possesses properties that benefits both good and diseased seed. Is a preservative against rotting in cold, wet weather; checks seedling blight; increases germination; invigorates growth; develops sturdier growth and promotes earlier maturity; in addition to which it improves the quality and increases the yield.

For Millets, Sorghums, Seed Potatoes—

Hot treatment—temperature 120 to 125 degrees. 1 pint to 30 gallons of water treats 30 to 50 bushels. Treatment 3 minute immersion. 1 Lb... \$.40; 6 Lbs... \$1.80

CORROSIVE SUBLIMATE

(Bichloride of Mercury)

For Seed Potatoes and Vegetable Plants—

A deadly poison. 4 oz. to 30 gallons of water treats 8 to 12 bushel. Immerse for 1½ to 2 hours.
½ Lb..... 75c 1 Lb..... \$2.75

COPPERCARB—(18% to 20% Copper)

Smut Spores in Wheat are easily killed.

5-lb. Cartons (6s).....Each 90c

COPPER CARBONATE—(50% plus Copper)

Two and one-half times as strong as Coppercarb.

5-lb. Bags (6s).....Each \$ 1.50

SEED TREATMENT

SMUT IN BARLEY: For Stripe and Covered Smut add 1 pint Formaldehyde to 30 gallons water (Not Heated). Soak seed for three hours.

For **COVERED SMUT** on **HULLESS BARLEY**, dust with Copper Carbonate, 2 to 4 oz. to bushel of grain.

SMUT IN OATS: For Loose Smut and Covered Smut add 1 pint Formaldehyde to forty (40) gallons of water and sprinkle on 40 bushel grain. Cover with sacks or canvas for two to four hours.

BUNT or STINKING SMUT IN WHEAT: Dust seed grain with Copper Carbonate, 2 to 4 ounces to the bushel, or Copper Carb, using 4 to 6 oz. per bushel. Mix in a barrel mixer so that all grains are covered with the dust. Treatment can be made at any time and grain can be stored without injury.

For **CONTROL** of **KERNEL SMUT** in **SORGHUMS**, add 1 pint of Formaldehyde to 30 gallons of water. Soak seed 1 hour and dry, or dust with Copper Carbonate, 2 to 4 ozs. to bushel.

For **CONTROL** of **SMUT** in **MILLET**, soak the seed 2 hours in Formaldehyde, 1 pint to 45 gallons of water. Copper Carbonate also effective.

SEED TREATING CHEMICALS priced on Page 71 of Catalog.

WITH CONFIDENCE

GOLD SEAL LAWN GRASS SEED

The essentials of a beautiful lawn are: rich, well drained soil; careful preparation of the ground to make it fine, smooth and mellow; sowing at a time when the young plants will have a chance to become well established before they are exposed to the vagaries of our Western climate, that is, dry or cold weather or hot burning sunshine, and last but not least, selection of the proper combination of grasses.

Our **GOLD SEAL LAWN GRASS MIXTURE** is just such a combination. It is a mixture of the purest and cleanest seed of only the highest grade grasses suitable for the purpose of making a beautiful, and lasting lawn. It germinates quickly, roots deeply and withstands the extreme hot weather of summer and the severe cold of winter.

It was developed by us many years ago and the close attention paid to the results obtained permits us to state that it is the leading lawn grass mixture in the west today. This popularity is attested to by the ever-increasing number of customers who will have nothing but **GOLD SEAL LAWN GRASS MIXTURE.**

EVERY FARM SHOULD HAVE A GARDEN**Why Not Grow What You Eat?**

A good garden can be maintained on a very small space and with fewer acres being tilled more time can be devoted to better gardens. They will help towards reducing expenses. (See Pages 2 to 33 of Catalog.)

Over 30 pages, finely illustrated, of every vegetable that is fully adapted to this country. QUALITY is paramount. GOLD SEAL means the Standard of Excellence. You can Buy and Plant GOLD SEAL Seeds with Confidence. Send for our 1937 Catalog. IT'S FREE.

PLANT TREES

Windbreaks and woodlots are great benefits and conveniences and small orchards of assorted fruit are of untold help. (See Pages 55, 56 and 57 of Catalog.)

Hand in hand with beautiful lawns go shrubbery, trees, bulbs, plants and vines. Be your place large or small, landscaping is essential toward beautifying your surroundings. Our stock is complete with only First Grade items that are particularly adapted for this country. A wide variety is open for your selection and a careful perusal of Pages 47 to 59 of our Catalog will prove worth your while.

INCREASE and MAINTAIN FERTILITY

Plant leguminous crops—Clover, Alfalfa, Peas. Yellow Sweet Clover is a good soilage crop and makes good pasture and hay. (See Pages 61 to 68 of Catalog.)

MAKE PERMANENT PASTURES

There are many grasses that can be used for permanent pastures for dry and irrigated sections. Adequate pastures reduce the carrying costs of milk cows and idle stock. (See Pages 60 to 68 of Catalog.)

FIGHT WEEDS

Frequent cultivation will aid in eliminating weeds. Cultivating tends to increase and maintain soil moisture. Weed plants, turned under before they mature seeds, add some humus. Weeds are destroyed by weed-killing compounds such as ATLACIDE CALCIUM CHLORATE.

Ask for Weed Control information.

See Catalog Page 72. Ask For Prices on Larger Quantities.

SEED POTATOES

When ready for them, write and tell us the quantity you will need and the variety you intend using and we will be glad to quote you promptly.
